97	KC9YRR	Bob				A: info for AI re: RF linking a Fusion repeater. Use FTM-100 or FTM-400 on HRI-200, with repeater frequencies programmed in (5W preferred). Feeds the signal to the repeater input, and the repeater TX to the input freq on the node radio.		
98	1:23 K0ORK	Chuck			C	a lot of new people. Quick run down on repeater etiquette, check out WiresX Bible. Leave pauses. Key up first, wait a second, talk, and then wait a second or two before unkeying (clips transmissions). Pauses are good.		
99	WB7OEV	Dewey			C	comment on VPN question. Been looking at Air VPN out of England.		
100	KC9ONA	Andy			C	comment on VPN question. Uses Private Internet Access, \$50 per year, allows port forwarding, worked fine with WiresX

107	WB6AJE	Jon	Los Angeles	CA	C	call sign covers signal strength meter. Tap on the call while it's up to toggle the signal strength meter		
108	W5KLD	Ken			Q	Q: FTM400, tx, unkeyed mic and LED went out on mic, indicator on panel was still transmitting. Anyone else have this happen? A: using a mic extension cable? I would give it a good check, retrim the ends and check the connector, also could be getting RF back into the cable.		
109	WX8U	Jeff				had TX issue without extension cable. Ended up warranting radio.		
110	WB8PAF	Bob	Panama City	FL	C	experienced same tx lockup issue on 400 after doing group mode.		
111	KB1FFX	Scott	Kerry	NC	C	has heard 2 people on DStar that live 4-5 miles from the repeater that RF link.
