| 78 | K5KOY | Koy | | | C | can't push DX button while repeater or node is keyed up (noticed Randal did this) | | |
| 79 | AE7RJ | Randal | | | | in much better now, will try DX button after the net. | | |
| 80 | WB8PAF | Bob | Panama City Beac | FL | N | | | |
| 81 | KC8YQL | Bill | | | Q | bringing new DR1X repeaters online. Swap out program for 1.10J? What's the advantage of going to 1.10J/DR2X? | | |
| 82 | K9EQ | | | | | info on DR2X. ethernet goes right into back of it. IMRS (network linking). dual receivers. still in development. 50W output. Shooting for fall to end of year for release. will work with Arcom and Socom controllers. DR1X will still be updated and sold. Only reason to go to 1.10J is to put HRI-200 into the back of the repeater. | | |
