Audio check		
Location of source files I'm using to capture data from a DV4mini: <a href="https://github.com/g4klx/YSFclients">https://github.com/g4klx/YSFclients</a> . You need to build the code - this distribution is for Visual Studio (works fine on VS2017 Community). The program runs under DOS and is started with a command like: YSFRX COM8 449525000 (COM port and frequency in Hz).
