2018/04/30	20:06:52	K9NXS-ND > MNWIS-FUSION : K9NXS, Ben, Houston, TX, no traffic						
2018/04/30	20:28:38	K0OQL-RPT2 > MNWIS-FUSION : propeller head? I thought this was tin foil hat head.						
2018/04/30	20:47:07	NW8J-RPT > MNWIS-FUSION : Please let Chuck know my portable/mobile node for Hamvention is #30074 and when in room #40074 Hamvention 2018						
2018/04/30	20:47:37	NW8J-RPT > MNWIS-FUSION : Ron AB8DT						
2018/04/30	20:52:36	NW8J-RPT > MNWIS-FUSION : If 147.525 does not work I will use 439.875						
2018/04/30	20:54:53	K7LW-RPT > MNWIS-FUSION : Another thing to keep in mind for repeater coverage is the antennas, and the angle of radiation. Repeater antennas tend to have a lower angle of radiation, when compared to regular base antennas.						
2018/04/30	20:55:32	K7LW-RPT > MNWIS-FUSION : With the FAA our antennas were configured to angle up since we were communicating with aircraft.						
2018/04/30	20:55:56	K7LW-RPT > MNWIS-FUSION : This will have a direct impact on the coverage of your repeater.						
2018/04/30	21:16:56	K0OQL-RPT2 > MNWIS-FUSION : if Bill has manual gps that may effect it also. I noticed if I have the GPS ON it works fine.
